

Sahamati/Circular/Member-Success/2026-08/01

Dated: 05 August 2026

Dear All,

Subject: Rate Limiting Control - CR APIs, Token Service APIs, Saans API

As part of the audit compliance, Sahamati has implemented rate limiting for all external APIs. This will take effect on August 6th, 2026.

The limits have been set to higher values to accommodate the current request volume received at Sahamati. However, stricter limits will be enforced after September 30th, as detailed below. Please note that these values may decrease further in the future, and we will notify you well in advance.

API	Rate Limiting Implementation	Current (24 hours)	Post Sep 30th (24 hours)
Entity Token Generate	Existing	300	300
User Token Generate	New	300	50
Entity Secret Read	New	300	50
Entity Secret Reset	Existing	5	5
CR - Get by type	New	1000	50
CR - Get by type & id	New	1000	50
SaaNs push	New	300	300

We request all entities to update their systems to limit the number of API requests sent to Sahamati accordingly by 30th of September, 2026.

Regards,
Member Services Team
